Intellectual Property Rights (IPR) In Pharmaceutical Industry

Course Overview

This course is designed to help each participants to gain knowledge and a comprehensive understanding of the framework of the intellectual property rights relevant to the pharmaceutical industry.

By attending this course, participants will gain a comprehensive knowledge of the key current topics, which they will examine them in more detail through case studies and comprehensive sessions that are being demonstrated by the best experts within the IPR sector in the MENA region.

Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of the property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is a prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity.

In the pharmaceutical sector, intellectual property (IP) rights, such as patents and regulatory data exclusivity, encourage and protect innovation and provide the needed incentives that drive R&D investments to areas of unmet medical need. An effective IP system gives innovators increased legal certainty that if a medicine makes it to the market, it will be protected from unfair competition for a limited time, that's why pharmaceutical companies heavily invest in lengthy and costly research and development processes to remain relevant in the market, accordingly, companies in the pharmaceutical industry usually depend on a period of both market exclusivity derived from patent protection, and data exclusivity in order to recoup their research and development costs.

Course Outcome

Attend this course and you will learn all you need to know about:

- ❖ Pharmaceutical patents
- ❖ Intellectual property rights and its types: (Patents, Copyrights, Trademarks, etc....)
- ❖ The Intellectual property rights conventions

- ❖ Patent laws and jurisdictions
- ❖ Alternatives to intellectual property Law
- ❖ Most Recent tools and databases of patent search and patent analytics

Educational Partner

Dubai Pharmacy College, the first pharmacy education institution in the Gulf region was established in 1992 to meet the growing needs of healthcare professionals. The beginning of a long journey to excellence and continued development was set forth by the astute visionary Haj Saeed Bin Ahmed Al Lootah under the leadership of Prof. Dr. Saeed Ahmed Khan.

The institution is committed to providing accredited pharmacy education for undergraduate and graduate-level female students, advancing pharmaceutical knowledge through research and community service in order to serve the pharmacy profession, the scientific community, and the public.

In 2005, it won the Dubai Quality Appreciation Programme award for education presented by Sheikh Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai.

INTELLECTUAL PROPERTY

Course Methodology

Our course relies on a variety of training and facilitation methodologies and techniques used whenever applicable; these methods aim to enhance participant interaction while maximizing the learning journey.

Some of these methods are:

- Interactive presentations
- Case studies

Course Structure & Duration

- ❖ One or two modules will be delivered by the speaker from industries and academia at the Dubai Pharmacy College.
- ❖ The course is conducted once a year.
- ❖ Participants will be evaluated based on one final assessment by the end of the course that will be conducted online.
- ❖ The certificate will be issued one month after the course end.

Why to Join

- ❖ Impart Knowledge and comprehensive understanding of the framework of the intellectual property rights relevant to the pharmaceutical and the health care sectors
- ❖ Network, and share experiences with other industry colleagues.
- ❖ Get certified from Dubai Pharmacy College as an IPR Professional.
- ❖ A gateway for a new career opportunity

Who Should Attend This course is ideal for law students and graduates or anybody with a pharmaceutical, science, healthcare, biotechnology, chemistry, biosciences, sciences, life sciences sectors, and/or engineering background desirous of specializing in IPR in the pharmaceutical & health care field.

It can also be useful for the below:

- ❖ Healthcare professionals who want to know more about IPR
- ❖ Regulatory Affairs Professionals
- ❖ Patent Attorneys
- ❖ Lawyers

Experience & Prerequisite Experience

- ❖ This course doesn't require any previous experience in (IPR)
- ❖ We consider applicants with different backgrounds

Course Timings

Sessions will start promptly at:
10:00 am and end at 2:00 pm
Dubai time, every Sunday morning.

Modules
